Jig Saw

- **high separing power**
- **the speed regulator assures perfect and constant cutting conditions**
- **highly durable**
- **simple operation**

Hand-guided cutting of different parts, especially metals and plastics. A high separating power is the basis for an efficient operation. The quick-response speed regulator assures a constant cutting speed and optimizes the low air consumption. The chain saw is designed for the heavy-duty 24/7 industrial operation. The high durability at a very low maintenance requirement is a further advantage.

High separating power

The flexible construction, the high separating power, the use of different materials and their application, assures an efficient cutting capability of supports, pipes, cables, etc.

The speed regulator assures perfect and constant cutting conditions

Our jig saw is equipped with a quick-response speed regulator, that utilizes the maximum motor power to keep the cutting operation constant.

Highly durable

Due to the efficient and well-tested construction, this saw is highly reliable and requires a low maintenance investment even when used in 24/7 operations.

Simple operation

A simple operation even when performing large sections, is possible due to the integrated clamping system.
PPP 35 AX

In our large product range you can find the chain saw of type SH 150-180 BX for the heavy-duty 24/7 industrial operation, this saw conforms to the highest requirements for tools used in explosions hazardous environments.
