

Press Release

Bayreuth – Amberg

DEPRAG honored as "Preferred System Integrator"

DEPRAG has been recognized as the "Preferred System Integrator" of Stäubli Tec-Systems Robotics. This distinction demonstrates Stäubli's appreciation of the loyal and reliable partnership between the companies. Over the many years of positive collaboration, DEPRAG has integrated a significant number of Stäubli robots in innovative applications.

Stäubli Robotics, a leading global robotics manufacturer, offers a high-performance product portfolio of four- and six-axis robots with capacities of up to 190 kg. Their standard robot range has continuously expanded to include specialized series for customized applications such as for clean and ultra-clean rooms, steam, explosive and sterile environments. Today these precise and flexible robots can be found in all market sections in industries as varied as the automotive, food, life sciences, machine building and plastics.

The sales strategy of Stäubli is built on long-term partnerships with system integrators. Stäubli Robotics support their partners in creating and developing customer-specific projects in all branches of leading automation solutions. "We deeply value close project collaboration with our clients. This recognition is designed to honor the cooperation with our partner DEPRAG, which has enabled the realization of numerous individual flexible and highly sophisticated automation solutions over many years", explains Gerald Vogt, Managing Director of Stäubli Robotics, Germany.

Originating from their core area of expertise: screwdriving technology, over the years DEPRAG has evolved into a well-established, globally active provider of assembly automation. A particular specialty is the implementation of

solutions for the automotive supplier industry and electronic production. "The solutions realized are implemented by our customers on a worldwide scale. Industry robots are being used ever more frequently as essential handling components. Their reliability, simple handling, and flexibility are decisive in relation to the success of the entire system. All these characteristics can be found in the products of our partner Stäubli Robotics", confirms Dr. Rolf Pfeiffer, COO of DEPRAG SCHULZ GMBH u. CO. in Amberg.

About Stäubli: Textile machines, coupling systems, and robots

Stäubli provides mechatronic solutions in the three branches of textile machines, coupling systems, and robots. Stäubli is today an

international corporation based in Pfäffikon, Switzerland employing over 4500 people, with their own subsidiaries in 25 countries and with representatives in over 50 countries worldwide.
