

POWER LINE

high performance air motors from 1.6 to 18 kW

The high starting torque on this machine, its unrivalled light weight, as well as its robust and reliable design are clear advantages in comparison with any electric drive.
 The product line of versatile high performance foot and flange motors is in a class of its own.

18 kW POWER LINE motor with IEC flange

OVERVIEW PRODUCT SPECTRUM POWER LINE MOTORS

The DEPRAG product spectrum consists of a variety of gear motors. If you cannot find a suitable motor for your application please contact us. As well as our catalogue range we offer low-cost customised system solutions.

POWER LINE motors ATEX conform with integrated holding brake

A =		 II 2G Ex h IIC T6 Gb X
		 II 2D Ex h IIIC T80 °C Db X
B =		 II 2G Ex h IIC T5 Gb X

C =		 II 2G Ex h IIC T4 Gb X
		 II 2D Ex h IIIC T130 °C Db X
D =		 II 2G Ex h IIC T3 Gb X
		 II 2D Ex h IIIC T195 °C Db X

POWER LINE motors – the smallest design size with the highest torque capacity.

If you require different speed rates, then we combine these motors with planetary-, worm-, or spur-gears that are ATEX compliant.

Your advantages:

- compact size
- high degree of efficiency

Performance class:

1.6 kW	Page 4
3.2 kW	Page 14
5.0 kW	Page 24
6.0 kW	Page 32

Accessories:

silencer	Page 42
maintenance unit	Page 43

POWER LINE motors with planetary gears

POWER LINE motors - high torque in a small package.

Without gears or optionally with precision planetary gears.

Your advantages:

- compact size
- high degree of efficiency
- choice of mounting position
- translation 5-50

Performance class:

1.6 kW	Page 6
3.2 kW	Page 16

Accessories:

silencer	Page 42
holding brake	Page 40
maintenance unit	Page 44

POWER LINE motors with worm gears

POWER LINE motors with worm gears are used when self-locking gears are required.

Your advantages:

- low-cost
- compact design
- high translation possible at a level of 14 - 80
- self-locking

Performance class:

1.6 kW	Page 8/10
3.2 kW	Page 18/20
5.0 kW	Page 28/29

Technical Information:

mounting position	Page 38
spindle designs	Page 41
flange designs	Page 41

Accessories:

maintenance unit	Page 44
------------------	---------

POWER LINE motors with spur gears

POWER LINE motors with spur gear offer user-defined translation options.

Your advantages:

- low cost
- translation: optional (i = 7 - 238)

Performance class:

1.6 kW	Page 12
3.2 kW	Page 22
5.0 kW	Page 30/31

4.6 kW Page 36

POWER LINE
High performance motors

THE DESIGN OF YOUR AIR MOTOR:

Calculating the motor performance:

$$P = \frac{M \times n}{9550}$$

P = Power output in kW
M = Nominal torque in Nm
n = Nominal speed in rpm

Power [HP] = P [kW] x 1.34
Torque [in.lbs] = M [Nm] x 8.85

The optimal working range of an air motor is close to the nominal speed.

If you require lower speeds than those mentioned in the catalogue then you can reduce the speed smoothly by throttling the exhaust air without significant loss of performance or torque.

By throttling the supply air or decreasing the operating pressure the speed, the torque and the performance of the motor can be reduced.

All performance data for DEPRAG air motors is based on operating pressure of 6 bar and the minimum allowable opening cross-section of the feed hose as stated in each motor's data.

If your surrounding conditions vary from this you will find a comprehensive guide to our motors in brochure D6000E. We will also be happy to answer any questions directly.

= optimal working range of the air motor

1.6 kW POWER LINE motors

The motors in this design series can be operated in either right- or left rotation. Alternatively, the motor can also be reversed by two external 3/2-way valves or one 5/3-way valve.

**Bracket
for motor size 55 and 65
(optional equipment)**

1.9 kW / 3.3 kW / 4.6 kW POWER LINE motors with hand lever valve

The motors in this design series can be operated in either right- or left rotation. Reverse is initiated by the integrated hand lever. Additionally, these motors incorporate a higher power output, when compared with the same design series with 2 air connections.

Holding brake

Our holding brakes are designed for the motors 68X-...F09, 68X-...F11, 68X-...F13 and 68X-...F15 and can be ordered fully mounted together with the motors.

In addition the holding brake is also suitable for upgrading.

We can carry out this upgrade for you on request.

Appropriate for each motor	Type	68X-...F09	68X-...F11	68X-...F13/...F15
Holding brake	Part no.	445709B	446196B	446062C

*) The holding brake is not designed for use with a different drive system. Please only use it in combination with the stated motor types.

The braking torque is generally double the nominal torque.

ACCESSORIES

Maintenance unit consisting of filter, oiler and double nipple - alternatively available with or without pressure regulator
Pressure regulation valve with manometer

Suitable for Motor size (MG) Type of motor	Part no. Maintenance unit with- out pressure regulator	Part no. Maintenance unit with pressure regulator	Part no. Pressure regulation valve with manometer	Thread size	Regulation range
MG9 ----- MG11 ----- FM32/KM32 ----- FM50/KM50 ----- MG13/15 ----- FM52/KM52 ----- 68X-001F55/IEC112A ----- 68X-001F65/IEC112A	821609A	821179A	821999A	G1	0.5 - 10 bar
	805044A	805044B	816657A	G 1 ½	
	350005A	350005B	816658A	G2	

821609 A
Maintenance Unit without pressure regulator G1

821179 A
Maintenance Unit with pressure regulator G1

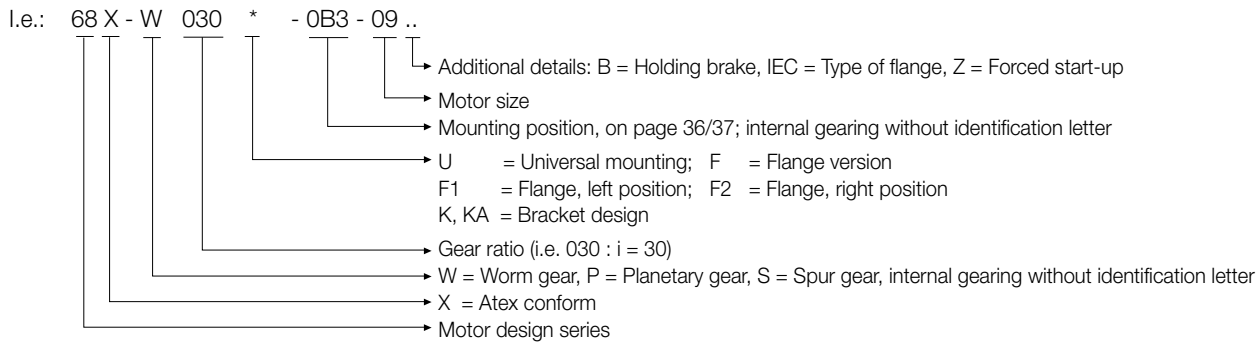

805044 A
Maintenance Unit without pressure regulator G1 1/2

350005 A
Maintenance Unit without pressure regulator G2

MODEL NUMBER DESCRIPTION - when ordering please indicate model designation

Use in potentially explosive environments

The correspondingly marked motors are suitable for use in potentially explosive environments.

Do you need support in selecting the right drive system?

Tell us your operational conditions and our application consultants will be happy to help:

Application:	<input type="text"/>		
In what kind of environment will the motor be installed?	ATEX requirement / explosion safety?	<input type="checkbox"/> yes	<input type="checkbox"/> no
	if yes, which safety class:	<input type="text"/>	
	food industry conformity?	<input type="checkbox"/> yes	<input type="checkbox"/> no
	sterilisable?	<input type="checkbox"/> yes	<input type="checkbox"/> no
	acid resistant?	<input type="checkbox"/> yes	<input type="checkbox"/> no
	steam resistant?	<input type="checkbox"/> yes	<input type="checkbox"/> no
Application conditions:	constant operation (24 hrs, non-stop)	<input type="checkbox"/> yes	<input type="checkbox"/> no
	duty cycle in hrs/day:	<input type="text"/>	
	days/year:	<input type="text"/>	
	cycle time (s):	<input type="text"/>	
	motor loaded to stall?	<input type="checkbox"/> yes	<input type="checkbox"/> no
	self-locking?	<input type="checkbox"/> yes	<input type="checkbox"/> no
Required turn direction:	<input type="checkbox"/> left	<input type="checkbox"/> right	<input type="checkbox"/> reversible
	(view from air inlet)		
Motor performance:	power:	<input type="text"/>	W
	nominal torque:	<input type="text"/>	Nm
	nominal speed:	<input type="text"/>	rpm
Performance influencing application conditions:	operating pressure (at motor inlet):	<input type="text"/>	bar
	operation with lubricated air possible?	<input type="checkbox"/> yes	<input type="checkbox"/> no
	smallest opening cross-section of connection pieces and hoses?	<input type="text"/>	mm
External motor design:	<input type="checkbox"/> standard steel	<input type="checkbox"/> non-corrosive	<input type="checkbox"/> aluminium
	<input type="checkbox"/> plastics	<input type="checkbox"/> ceramics	
	other:	<input type="text"/>	
Drive spindle design:	drive shaft requirements:	<input type="text"/>	
	(e. g. keyed shafts, square end, hexagonal, collet, drill chuck taper, etc.)		
	required dimensions:	<input type="text"/>	
Motor fixture design:	mounting requirements: (bracket, flange, etc.)	<input type="text"/>	
	required dimensions:	<input type="text"/>	
Additional components:	<input type="checkbox"/> holding brake	<input type="checkbox"/> operational brake	
	gear box:	<input type="text"/>	
Price range:	<input type="text"/>		
Annual requirement:	<input type="text"/>
